## IP110H: Icom's Newest Compact WLAN Radio

**KIRKLAND, Wash. (August 2022)** – Introducing Icom's newest license-free WLAN transceiver, the IP110H. This compact and lightweight wireless radio is perfect for those needing to stay connected while on the move.

With the IP110H, you can quickly make all, group, talkgroup, individual, and telephone calls with the push of a button. While doing so you can communicate with teams like a telephone conversation with Icom's Simultaneous TalkListen function. With most two-way radios, if you are receiving, you cannot transmit. TalkListen makes conversations more natural by allowing users to talk and receive at the same time, streamlining communications, and keeping your team informed, safe, and efficient. An optional Bluetooth® headset (VS-3) is available for discreet or hands-free use though one is not required for full TalkListen functionality.

The IP110H may be small in size (2.2" × 3.8" × 1"), but with a durable waterproof and dust-tight design (IP67/ IP54) that meets MIL-STD-810-G and over 20 hours of battery operating time, users can focus on the task at hand. Other features of the IP110H include audio recording for instant review, 1000 mW-loud audio, incoming call, and message vibration alerts, and Over-the-Air programming (OTAP). Safety features include Motion/ Stationary Detection, Man Down, and Lone Worker, all of which send an emergency call when triggered.

Icom is known worldwide for manufacturing the most innovative land mobile radios and network products. In a world where technology is ever-evolving, Icom continues to stand the test of time with leading-edge forward-thinking. Radio users worldwide choose Icom for legendary durability, quality, dependability, and ease of use.
